LYXION

INDUSTRIAL IOT PORTFOLIO MANAGEMENT

Have a talk with us

WHY TALK WITH US ?

Lyxion is founded based on over a decade of experience in IoT which is wrapped in a consulting and multi layer support offering

with the aim to become a single source of advice for our customers, with regards to all connected devices

LYXION
INDUSTRIAL IOT PORTFOLIO MANAGEMENT

IIoT Accountability & transparency	Portfolio Management
IIoT Competences & knowledge access	Support services
Value driven IIoT innovation	Ideation and experiments

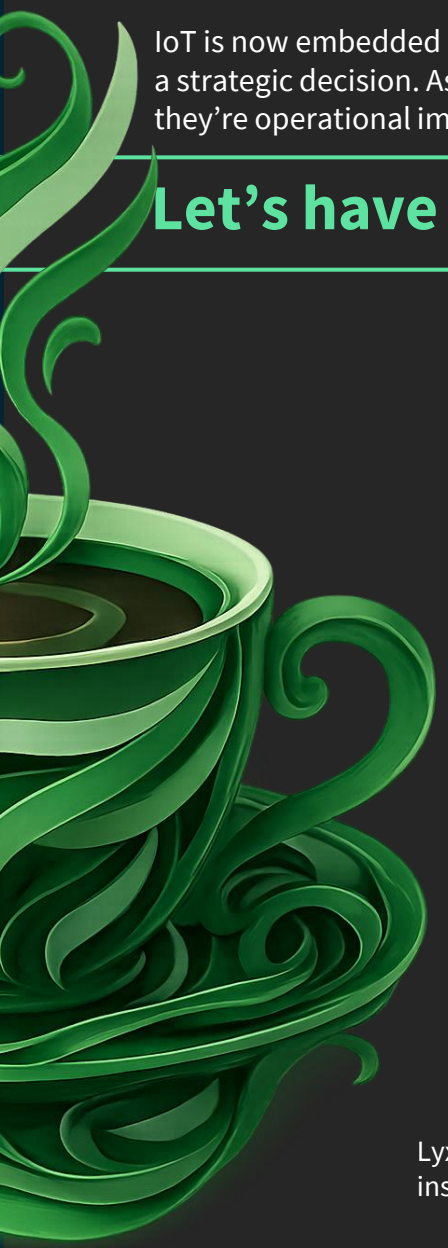
As we are supported by dozens of field specialists and top tier partners

We surely can bring at least a few new insights to the table that you won't find anywhere else

HAVE A COFFEE MOMENT TO TALK ABOUT THE FUTURE OF IOT

IoT is now embedded in nearly every solution, with native connectivity becoming the norm—turning each device into a potential access point and each deployment into a strategic decision. As regulations like NIS2, the Cyber Resilience Act, and the EU Data Act move to the forefront, compliance and security are no longer optional—they're operational imperatives.

Let's have a coffee talk to see how this might impact you…



We can talk about:

Impact of NIS2 and other regulations

Strategic Themes

- Impact on **innovation**
- Impact on **IoT management**
- Impact on **vendor relationships**

Operational Domains (some examples)

- Sustainability initiatives (e.g., ESG, energy targets)
- Energy & water monitoring (smart meters, sensors)
- Predictive or remote machine maintenance
- Remote access to devices/systems (IT/OT convergence)
- CO_2 monitoring and environmental compliance
- Fleet management (location, usage, emissions tracking)

Or about:

Why creating IoT passports will become mandatory?
Maybe about certification?
Or why is there need for an organizational change?
We can talk about your future customers needs?

- On hardware
- On software
- On incident management
- On certification

Or something more exotic:

- Tax fiscal IoT optimization
- Secure private networks
- Emerging technologies
- Process driven IoT

Lyxion is a single point of advice with decades of experience in the IoT space and it focuses on the "how" and "why" of managing IoT inside organizations.
